

Airtel IQ

Business Connect

Challenges with existing Communication Tools in Market

For most SMBs, the field force or salespeople play a key role to build and maintain customer relationships. Therefore, clear communication is essential to keep strong and long-term connections with customers, but...

1

- No Omni-Channel tool for field force as separate software used for chat, calls, and WhatsApp.

2

- Field forces using personal or COCP numbers leads to communication inconsistencies

3

- Use of personal or COCP numbers limits visibility, making a holistic communication view difficult

4

- Field force switching jobs may take their numbers and customer data, harming businesses.

5

- Heavy Capex required for on-premise deployment of PBX systems

Introducing Airtel IQ Business Connect

A unified communication tool that keeps the business connected...

Omni-channel experience with WhatsApp for Business integration right into the app

Field force can take call on-the-go or on their desktop by using the call flip feature

Virtual phone system with dedicated mobile and desktop applications

Each Virtual Mobile Number (VMN) costs ₹ 399 per month

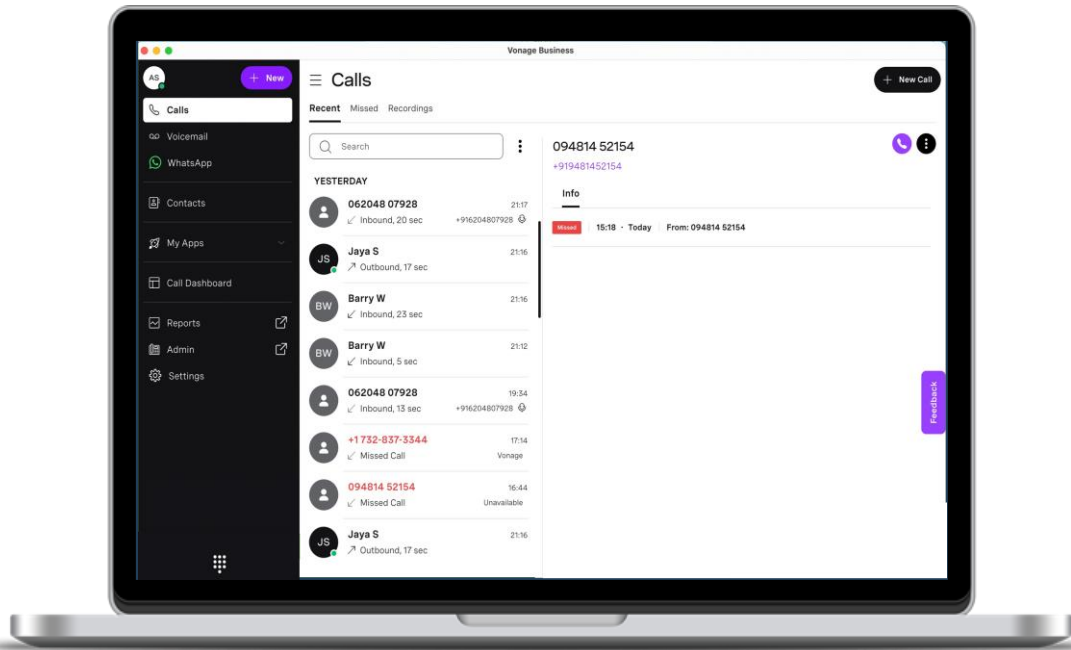

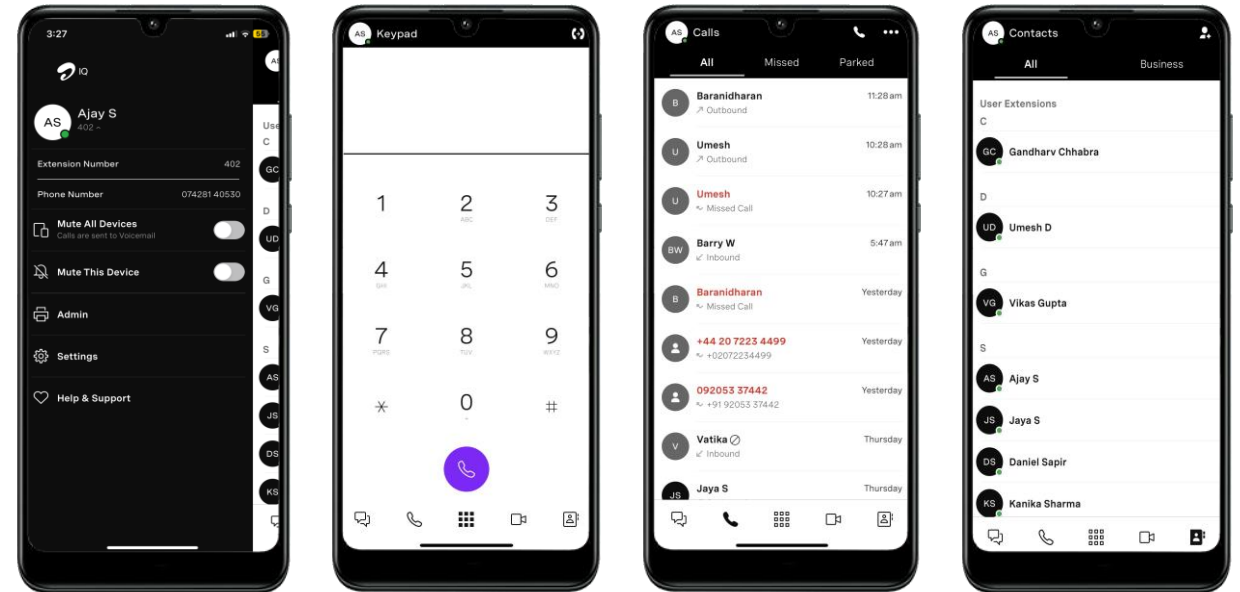

IQ Business Connect: Vonage Business App

IQ Business Connect provides **Vonage Business app** for unified communication. The app is available for **desktop on Windows and Mac**, as well as for **mobile on iOS and Android**

Desktop app view

Mobile app view

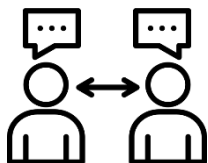

Vonage Business app can be downloaded from the **Google Play store** or the **App store**

IQ Business Connect: Calling Features

IQ Business Connect offers users a full suite of **PBX-like calling features**, including:

Associated Telephone Numbers to Extension

Users are assigned an internal extension number for internal communication

Personal Directory

Contact are stored for easy access

Call Add Participants

Users can initiate conference calls where they can add up to 5 participants

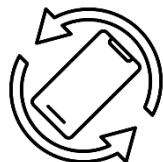

Call Blocking

User can block the incoming calls (if the feature is enabled by the admin)

Call Dashboard

Users can check call recordings, status, duration and more

Call Flip

Seamlessly transfer an active call between desktop and mobile app

Call Forwarding

Redirect incoming calls to another number

Voice Mail

Record and retrieve messages left by callers

Call Park & Retrieve

If a user is on a call and receives another call, they can park the first call using an admin-assigned code and retrieve it later using the same code

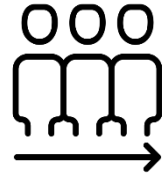

IQ Business Connect: Calling Features

IQ Business Connect offers users a full suite of **PBX-like calling features**, including:

Call/Hunt Groups

Route incoming calls to multiple devices or app users.

Call Queues

A contact center feature that queues calls (often a virtual or mainline number) when agents are busy and automatically transfers them to an available agent.

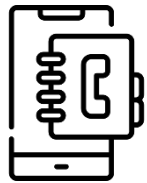

Call Monitor including Barge & Whisper

Admin can monitor active calls between users and customers. Whisper mode(listen silently without interrupting) & Barge mode(t intervene and take over the conversation).

Call Recording

Admins can access unlimited call recordings for 30 days. Additional charges apply for access beyond 30 days, as recordings are auto-deleted.

Call Log

Users can View recent or missed calls

Caller ID

User can set their caller ID as company mainline number. This is enabled by admin only

Do Not Disturb

Temporarily silence calls

Greetings

Standard greeting message can be played for customers

Hold Call

Admin can select a file which will be played if the users are hold

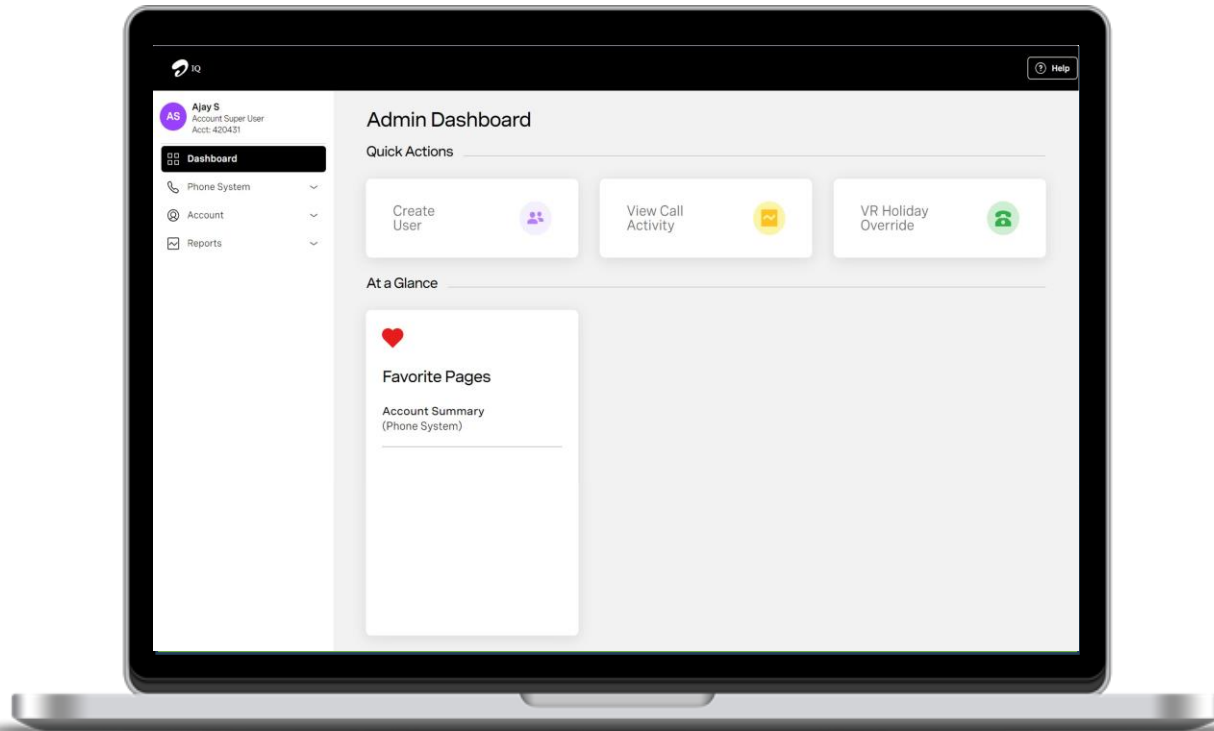

IQ Business Connect: Admin Portal

It provides an **admin portal (Account Super User – ASU portal)** to onboard and manage field force with virtual numbers

Here are the features:

- **Call Dashboards** to monitor field force calls with whisper and barge-in features
- **Call Recording** for monitoring field force performance and improving the Company's capability for security & compliance
- **Virtual Receptionist:** Streamline call handling and routing.
- **Add Extensions:** Expand user accessibility
- **User Management:** Add/Edit users as required
- **Call Waiting Setup:** Optimize call flow management
- **Call Group Setup:** Organize teams for better collaboration
- **Audit Log:** Track account activities for transparency
- **Account Permissions:** Control access based on roles.
- **Reports:** Generate insights for performance monitoring
